

Systems Engineering – A Key to Competitive Advantage for All Industries

Proceedings of the
2nd European Systems Engineering Conference (EuSEC 2000)
Munich, September 13th-15th, 2000

Hosted by:

Division of Astronautics
Technische Universität München
Prof. Dr.-Ing. Eduard Igenbergs

The Netherlands Chapter of INCOSE

Editors:

Dr. Herbert Negele
Dr. Ernst Fricke
Armin Schulz

Foreword

The EuSEC 2000 committee is proud to present the Proceedings of the 2nd European Systems Engineering Conference. This conference was organized and hosted by the Gesellschaft für Systems Engineering e.V. – German Chapter of INCOSE, the Netherlands Chapter of INCOSE and the Division of Astronautics of the Technische Universität München. Additionally, the conference was supported by INCOSE Central.

The papers of the EuSEC 2000 – built around the conference theme ‘Systems Engineering - A Key to Competitive Advantage for All Industries’ – are highlighting different aspects of the application of systems engineering in industry and new approaches developed by research institutions. In Munich, engineers, researchers and managers came together to continue learning, understanding, and practicing world class systems engineering in industry, academia, and government.

A conference such as the 2nd European Systems Engineering Conference is made possible by the volunteer efforts of many people, by our sponsors, the authors and all conference attendees. Therefore, first we want to thank all volunteers who helped to make this conference happen. Especially we want to mention our paper reviewers.

Next, we especially thank the European Aeronautic Defence and Space Company (EADS) for sponsoring these Proceedings, and QSS for sponsoring the production of the CD ROM. Additionally we thank all our conference sponsors who contributed to making the 2nd European Systems Engineering Conference happen.

Also, we want thank our key note speakers Dr. Donna Rhodes (Lucent Technologies), Hans-Georg Frischkorn (BMW Group) and Dr. Stefan Levedag (EADS) for taking the time to present us their view on Systems Engineering.

We hope that all conference attendees will enjoy the time in Munich, learn something valuable, and return back to their companies with new ideas and contacts to make their current and future projects a success.

Ralf Hartmann	Conference Chair
Dr. Ernst Fricke	Technical Co-Chair
Dr. Herbert Negele	Technical Co-Chair

The 2nd European Systems Engineering Conference was sponsored by:

Platinum Sponsor
Quality Systems and Software

Military Aircraft

Gold Sponsor
European Aeronautic Defence and Space Company

Gold Sponsor
ASTRIUM

Silver Sponsor
Aircraft Development and Systems Engineering

EuSEC 2000 Planning Committee

Conference Chair	Ralf Hartmann
Technical Co-Chairs	Dr. Ernst Fricke Dr. Herbert Negele
Exhibits and Sponsors	Ralf Hartmann
Symposium Management and Administration	Andrea Schindler Armin Schulz
Finance	Rüdiger Kaffenberger
Communications	Christof Schneider Uwe Strauss Maarten Verhoeven
Social Events	Florian Harzenetter
Facility Management	Stefan Wenzel Martin Wilke

The following persons are gratefully acknowledged for their valuable contributions to the technical paper review process:

Derk Bol	ADSE
Prof. Don Clausing	CIPD/Massachusetts Institute of Technology
Ken Crowder	Crowder & Associates
Paul Davies	Racal Defense Electronics
Dr. Ernst Fricke	CargoLifter Development GmbH
Andrew Gabb	Technology Australasia
Valerie Gundrum	Lockheed Martin Federal Systems
Robbert Hamann	TU Delft
Florian Harzenetter	Siemens
Rüdiger Kaffenberger	Marconi Communications
Virginia Lentz	Otis Elevator
Pete Lister	Aerosystems International
Dr. Herbert Negele	BMW Group
Dr. Klaus Paul	CargoLifter Development GmbH
Jack Ring	Innovation Management
Andrea Schindler	EADS
Dr. Johann Schregenberger	ETH Zürich
Armin Schulz	FG Raumfahrttechnik, TU München
Prof. Heinz Stoewer	SAC Space Associates
Wim van Leeuwen	ADSE
Andreas Vollerthun	FG Raumfahrttechnik, TU München
Stefan Wenzel	FG Raumfahrttechnik, TU München
Martin Wilke	FG Raumfahrttechnik, TU München
Bill Wittig	Delphi Automotive

Table of Contents

Session 1.1 Metrics, Monitoring and Decisions

1.1.1	Project Monitor and Control: The Role of Project Director W.W. Schoening	3
1.1.2	Metrics for Winning Systems R.B. Campbell	11
1.1.3	Strategic Balancing — A Unifying Methodology for Management and Efficient Decision Making J.A. Cogliandro	21

Session 2.1 SE Cases

2.1.1	Introducing System Engineering in a Tender Environment; Traffic Control Test Centre Case Study G.J.C. Ransijn, W.J.W. Geurts, F.L. Buve	31
2.1.2	Structure Subsystem Development in a Complex European Space Programme S. Kögl	37
2.1.3	Mission Preparation and Training Facility for ERA M. Schoonmade, Z. Pronk, W. Baig	45

Session 1.2 Requirements and Specifications

1.2.1	Model based Systems Engineering — A Unified Approach Using UML P. Braun, M. Rappl	53
1.2.2	Complexity Control by Fractal Specification (FraSp) — A Practicable Approach? R. Ludwig, M. Kokes, H.D. Bürgel	59
1.2.3	Dynamic Interface Management in a Transport Infrastructure Project J. van der Laan, L. Wildenburg, P. van Kleunen	65
1.2.4	An Approach to Quantitative Non-Functional Requirements in Software Development A.J. Ryan	73

Session 2.2 Process Modeling and Management

2.2.1	A Standardisation Concept for Non-Standard Development Projects	
	D. Scheithauer, A. Schindler	83
2.2.2	Architecture for a Process Meta-System	
	V. Gundrum	93
2.2.3	Process Knowledge Management in Concurrent Engineering	
	H. Schott, A. Sieper, T. Rose, M. Fünffinger, C. Rupprecht, C. Schlick, M. Mühlfelder,	101
2.2.4	Deliver Complex Projects Successfully by Managing Uncertainty	
	D. Mawby, D.W. Stupples	109

Session 1.3 SE Frameworks and Approaches

1.3.1	Towards the Development of a Domain-Specific Framework for Systems Engineering: Commercial Aircraft	
	S. Jackson, G. Mathers, M.J. Simpson, J.J. Simpson, C. Atkinson, E. Duurland, A. Jain	121
1.3.2	Coupling Changes to Product-, Process-, and Agent-System Architectures — A Holistic Framework for Change in Product Development Organizations	
	S. Wenzel, E. Igenbergs, T. Michl, F. Megerle	129
1.3.3	U.S. Dept. of Defense Systems Engineering and Implications for SE Implementation in Other Domains	
	M.J. Simpson, J.J. Simpson	139
1.3.4	New Technology Development — The Joint Role of Product and Technology Development	
	S. Sampathkumar, D.P. Clausing, A.P. Schulz, E. Fricke	147

Session 2.3 System Design Approaches

2.3.1	Small Avionics System Design Example	
	A. Schönhoff, M. Heller, K. Bollfrass, W. Nosse	155
2.3.2	A Systems Theoretic Process for Efficient Design of Optimal Systems	
	T. Shell	165
2.3.3	Beyond Tool Exchanges — The Current Status and Future Implications of the Emerging ISO Standard AP233	
	K. Heimannsfeld, J. Johnson, E. Herzog, C. Düsing	177
2.3.4	Systems Engineering — (with a Generic Model) — A Key to Competitive Advantage for All Industries	
	G.F.J. Caple	187

Session 1.4 System Testing

- 1.4.1 **Increasing Importance of Testing within Systems Engineering**
R.D. Mercer, K.A. Horst 197
- 1.4.2 **System Test Metrics on a Development-Intensive Project**
P. Davies 205

Session 2.4 SE Disciplines

- 2.4.1 **Use of Concurrent Engineering in Space Mission Design**
S.D. Wall 215
- 2.4.2 **Supporting Human Communication in Network-based Systems Engineering**
D. Harris 221

Session 1.5 Simulation, Integration, Verification

- 1.5.1 **Improving Rail Safety through Simulation and Hardware-in-the-Loop Verification**
M. Irving, I. Wilson 229
- 1.5.2 **SYSDESIGN: Virtual Integration Platform for Distributed Automotive Software Systems**
P. Schiele 235
- 1.5.3 **A Model Based Development and Verification Process for Satellite Design**
A. Löffler, J. Flemmig, D. Reggio 243

Session 2.5 Systems Engineering the Enterprise

- 2.5.1 **A Generic Approach to Implement Information-Based System Development**
A.P. Schulz, E. Fricke, P. Wehlitz, H. Negele 255
- 2.5.2 **Integrated Enterprise Strategic Business Planning and Process Improvement**
L. Totty, J.L. Loveland Link, B. Larman 263
- 2.5.3 **Enterprise Systemics: Systems Thinking for Plotting Strategy at the ‘Extended Enterprise’ Level**
A. Fairbairn, A. Farncombe 273

Session 1.6 Concept Design Center 1

- 1.6.1 **The Proliferation of PDC-Type Environments in Industry and Universities**
R. Shishko 287
- 1.6.2 **The Satellite Design Office at Astrium — A Success Story of an Industrial Design Center Application**
R. Mager, R. Hartmann 293
- 1.6.3 **The NPDT — The Next Generation Concurrent Design Approach**
K.I. Oxnevad 303

Session 2.6 Training and Human Issues

- 2.6.1 **Conversion / Training of High Tech Labor Resources**
D.P. Ferrigno, R. Rantschler, P.E. Jenkins 311
- 2.6.2 **A Systems Engineer’s Guide to Human Subsystems**
H. Kurstedt 317

Session 1.7 Concept Design Center 2

- 1.7.1 **The ESA/ESTEC Concurrent Design Facility**
M. Bandecchi, B. Melton, B. Gardini, F. Ongaro 329
- 1.7.2 **MUSSAT — A Tool For Satellite Design in Concept Design Centers**
M. Wilke, O. Quirnbach, M. Schiffner, E. Igenbergs 337

Session 2.7 Advanced Methods

- 2.7.1 **„Remember that time is money!“ — How can the reduction of time in the product development process be measured and expressed in financial terms?**
A. Schlechtweg, M. Kokes, H.D. Bürgel 347
- 2.7.2 **Improving the Valuation of Research and Development: An Integrated Decision Framework**
C.P. Bauer, D.P. Clausing, A.P. Schulz 355
- 2.7.3 **RAMS/LCC: The Forgotten Systems Engineering Discipline**
R.J. van Baaren, K. Smit 361
