Andresen, K.
A Framework of Adaptability-Concepts for Enterprise Ressource Planning Systems
K. Andresen, N. Gronau
University of Potsdam, Germany

Akanle, O. M.
Supply Chain Optimisation: A Multi-Agent Systems Approach
O. M. Akanle, D. Z. Zhang
University of Exeter, UK

Alexopoulos, K.
DESYMA - An integrated method to Aid the design and the evaluation of RMS
K. Alexopoulos, S. Bürkner, I. Milionis, G. Chryssolouris
DaimlerChrysler AG, Germany

Althaus, K.
Quality Information Systems in Production Networks
A. Gerber, M. Dietzsch, K. Althaus
Chemnitz University of Technology, Germany

Amati, G.
Visual Overlay of Real and Virtual Objects in a CAD system
A. Liverani, L. Carbone, G. Amati
University of Bologna, Italy

Anosike, A. I.
Dynamically Integrated Manufacturing Systems- Concepts and Supporting Methodology
D. Z. Zhang, A. I. Anosike, M. K. Lim
University of Exeter, UK

Anttila, M.
Integrating Cost of Ownership Analysis into Component-Based Simulation
J. Heilala, K. Helin, J. Montonen, P. Voho, M. Anttila
VTT Industrial Systems, Finland

Anosike, A. I.
Dynamically Integrated Manufacturing Systems- Concepts and Supporting Methodology
D. Z. Zhang, A. I. Anosike, M. K. Lim
University of Exeter, UK

Araki, M.
Holistic Methodology for Business Process Reengineering
M. Nakano, F. Kubota, S. Sato, C. Roser, M. Araki
Toyota Inc., Japan

Armoutis, N.
Partner Profiling to support Agile Design
N. Armoutis, P. Matthews, C. Lomas, P. Maropoulos
University of Durham, UK

Avai, A.
Changeability as a key for lifecycle oriented investment evaluation
A. Urbani, A. Avai
National Research Council, Italy

Bär, T.
Objectives of a seamless digital process chain in the automotive industry
T. Bär, J. Kiefer, G. Schmidgall, H. Burr
DaimlerChrysler AG, Germany

Barbieri, P.
Information Exchange Processes and Supply Chain Relationships: an investigation in the Emilian Motor District
Bihlmaier, R.
Planning of Flexible Production Networks in the Automotive Industry
M. Friese, R. Bihlmaier, S. Bürkner
DaimlerChrysler AG, Germany

Bischoff, J.
Intelligent Logistics for Innovative Product Technologies within the EU 5-Day Car Initiative
W. Sihn, J. Bischoff, M. Esterházy
Vienna University of Technology, Austria

Bürkner, S.
Planning of Flexible Production Networks in the Automotive Industry
M. Friese, R. Bihlmaier, S. Bürkner
DaimlerChrysler AG, Germany
Methods for flexibility evaluation in the automotive industry
S. Bürkner, M. Friese, M. Schmitt, J. Roscher
DaimlerChrysler AG, Germany

DESYMA - An integrated method to Aid the design and the evaluation of RMS
K. Alexopoulos, S. Bürkner, I. Milionis, G. Chryssolouris
DaimlerChrysler AG, Germany

Burduk, A.
Modelling and variant simulation in risk evaluation of starting-up production programme
E. Chlebus, A. Burduk
Wroclaw University of Technology, Poland

Burr, H.
Objectives of a seamless digital process chain in the automotive industry
T. Bär, J. Kiefer, G. Schmidgall, H. Burr
DaimlerChrysler AG, Germany

Carbone, L.
Visual Overlay of Real and Virtual Objects in a CAD system
A. Liverani, L. Carbone, G. Amati
University of Bologna, Italy

Chilov, N.
Ontology-Driven Knowledge Sharing in Global Supply Chains
A. Smirnov, M. Pashkin, T. Levashova, N. Chilov
Russian Academy of Sciences, Russia

Chlebus, E.
Modelling and variant simulation in risk evaluation of starting-up production programme
E. Chlebus, A. Burduk
Wroclaw University of Technology, Poland

Chryssolouris, G.
DESYMA - An integrated method to Aid the design and the evaluation of RMS
K. Alexopoulos, S. Bürkner, I. Milionis, G. Chryssolouris
DaimlerChrysler AG, Germany

Clarke, S.
Telepresent Production: Overcoming the Network Problem with Recurrent Neural Networks
R. Grothmann, A. Schaefer, S. Clarke, M. F. Zaeh
Siemens AG, Germany; Technische Universität München, Germany

Culha, B.
Rule Based Approach for Capturing an Reapplication of Manufacturing Knowledge in Production Development
R. Krikler, B. Culha
Universität Karlsruhe (TH), Germany

Culley, S.
Design for Changeover (DFC): enabling the design of highly flexible, highly responsive manufacturing processes
M. Reik, S. Culley, A. Mileham, G. Owen, R. McIntosh
University of Bath, UK

Dekkers, R.
Complexity based approach for collaborative enterprise networks
R. Dekkers, A. Sauer, M. Schönung, G. Schuh
RWTH Aachen, Germany

Denkena, B.
Concept for a comprehensive operator training based on an interactive machine tool simulation model
B. Denkena, K. Tracht, S. Rehling
University of Hannover, Germany

Dietzsch, M.
Quality Information Systems in Production Networks
A. Gerber, M. Dietzsch, K. Althaus
Chemnitz University of Technology, Germany

Eckers, R.
Ramp-Up and Maintenance with AR in Development of Flexible Prod. Control Systems
J. Gausemeier, W. Schäfer, R. Eckes, R. Wagner
University of Paderborn, Germany

ElMaraghy, H. A.
Mapping Products Machining Requirements and Machine Tools Structure Characteristics in RMS
A. I. Shabaka, H. A. ElMaraghy
University of Windsor, Canada

Erlach K.
Rapid and Agile Production by Value Stream Oriented factory Planning
K. Erlach
Fraunhofer IPA, Germany

Esterházy, M.
Intelligent Logistics for Innovative Product Technologies within the EU 5-Day Car Initiative
W. Stih, J. Bischoff, M. Esterházy
Vienna University of Technology, Austria

Fleischer, J.
Simulation Based Optimization of Work Piece Handling in Agile Manufacturing Systems
J. Fleischer, A. Stepping, J. Wieser
Universität Karlsruhe (TH), Germany

Fleischer, J.
A Concept for Configuration and Optimization of Global Value Added Networks
J. Fleischer, M. Herm, K. Peter, K. H. Sternemann
Universität Karlsruhe (TH), Germany

Frank, A.
New robot guided fixture concept for reconfigurable assembly systems
M. Gödl, I. Kovac, A. Frank, H. Rechberger, K. Haring
Graz University of Technology, Austria

Graz University of Technology, Austria

Graz University of Technology, Austria

Graz University of Technology, Austria

Graz University of Technology, Austria
Friedrich, Ch.
Increasing utilisation of automotive body shops by flexibility optimization
G. Schuh, N. Wemhöner, Ch. Friedrich
RWTH Aachen, Germany

Friese, M.
Planning of Flexible Production Networks in the Automotive Industry
M. Friese, R. Bühlmaier, S. Bürkner
DaimlerChrysler AG, Germany
Methods for flexibility evaluation in the automotive industry
S. Bürkner, M. Friese, M. Schmitt, J. Roscher
DaimlerChrysler AG, Germany

Fritz, W.
Virtual Simulation and Off-line Programming of Robot Guided Reconfiguration Systems
W. Fritz, I. Kovac, A. Frank
Graz University of Technology, Austria

Gausemeier, J.
Ramp-Up and Maintenance with AR in Development of Flexible Prod. Control Systems
J. Gausemeier, W. Schäfer, R. Eckes, R. Wagner
University of Paderborn, Germany

Gocke, A.
Change management: from plan to action
A. Gocke
The Boston Consulting Group, Germany

Gödl, M.
New robot guided fixture concept for reconfigurable assembly systems
M. Gödl, I. Kovac, A. Frank, H. Rechberger, K. Haring
Graz University of Technology, Austria

Goldhahn, L.
Knowledge based approach to adapt multimedia process descriptions for process planning and manufacturing
L. Goldhahn, M. Kaiser
University of Applied Sciences Mittweida, Germany

Gottschalk, L.
Flexibility Management System – concept and tool for the analysis and configuration of alternatives to adapt manufacturing capacity
L. Gottschalk, S. Guenther, R. Hornung
Swiss Federal Institute of Technology, Switzerland

Gronau, N.
A Framework of Adaptability-Concepts for Enterprise Ressource Planning Systems
K. Andresen, N. Gronau
University of Potsdam, Germany

Grothmann, R.
Telepresent Production: Overcoming the Network Problem with Recurrent Neural Networks
R. Grothmann, A. Schaefer; S. Clarke, M. F. Zaeh
Siemens AG, Germany; Technische Universität München, Germany

Guenther, S.
Flexibility Management System – concept and tool for the analysis and configuration of alternatives to adapt manufacturing capacity
L. Gottschalk, S. Guenther, R. Hornung
Swiss Federal Institute of Technology, Switzerland

Gupta, S. M.
Long-Range (Strategic) Planning Issues in Reverse Logistics
S. M. Gupta, K. K. Pochampally
Massachusetts Institute of Technology, USA

Haring, K.
New robot guided fixture concept for reconfigurable assembly systems
M. Gödl, I. Kovač, A. Frank, H. Rechberger, K. Haring
Graz University of Technology, Austria

Heilala, J.
Integrating Cost of Ownership Analysis into Component-Based Simulation
J. Heilala, K. Helin, J. Montonen, P. Voho, M. Anttila
VTT Industrial Systems, Finland

Helin, K.
Integrating Cost of Ownership Analysis into Component-Based Simulation
J. Heilala, K. Helin, J. Montonen, P. Voho, M. Anttila
VTT Industrial Systems, Finland

Herrn, M.
A Concept for Configuration and Optimization of Global Value Added Networks
J. Fleischer, M. Herrn, K. Peter, K. H. Sternemann
Universität Karlsruhe (TH), Germany

Hofmann, M.
Migration of monolithic ERP-Systems to flexible and component-based ERP-Systems
E. Schuster, O. Olivier, M. Hofmann
Mieschke Hofmann und Partner Porsche Services Company, Germany

Hornung, R.
Flexibility Management System – concept and tool for the analysis and configuration of alternatives to adapt manufacturing capacity
L. Gottschalk, S. Guenther, R. Hornung
Swiss Federal Institute of Technology, Switzerland

Ihara, T.
Combination of Human Resources for faster Spread of Process Innovation produced successively in Production Systems
T. Ihara
Chuo University, Japan

Iliev, N.
Flexibility Contracting in Make-To-Order Environments
N. Iliev, M. Jeck, O. Kraemer
Swiss Federal Institute of Technology, Switzerland

Ishida, T.
On-site Visualization of Workpiece State for enhancing the recognition ability of machining operators
K. Teramoto, R. Tanaka, T. Ishida, Y. Takeuchi
Osaka University, Japan

Iskanius, P.
E-supply application - A Finnish case study
P. Iskanius, H. Kilpala, S. Uusipaavalniemi
University of Oulu, Finland

Jacot, J.
Programming of assembly-cells by shop floor operators: a solution for short reconfiguration
S. Koelemeijer, C. Wulliens, J. Jacot
Ecole Polytechnique Fédérale de Lausanne, Switzerland

Jähn, H.
On Issues concerning the Phases of Evaluation and Break-up of Virtual Enterprises
H. Jähn, S. Sachtleben, L. Zschorn
Chemnitz University of Technology, Germany

Jeck, M.
Flexibility Contracting in Make-To-Order Environments
N. Iliev, M. Jeck, O. Kraemer
Swiss Federal Institute of Technology, Switzerland

Kaiser, M.
Knowledge based approach to adapt multimedia process descriptions for process planning and manufacturing
L. Goldhahn, M. Kaiser
University of Applied Sciences Mittweida, Germany

Kapp, R.
Integrated Factory and Logistics Planning
R. Kapp, J. le Blond, B. Lößfler, E. Westkämper
University of Stuttgart, Germany

Kiefer, J.
Objectives of a seamless digital process chain in the automotive industry
T. Bär, J. Kiefer, G. Schmidgall, H. Burr
DaimlerChrysler AG, Germany

Kilpala, H.
E-supply application - A Finnish case study
P. Iskanius, H. Kilpala, S. Uusipaavalniemi
University of Oulu, Finland

Kissner, H.
Combining Virtual Reality and Assembly Simulation for Production Planning and Worker Qualification
M. Schenk, S. Straßburger, H. Kissner
Fraunhofer IFF, Germany

Koch, T.
Cost Management Framework for a Value Stream
T. Sobczyk, T. Koch
Wroclaw University of Technology, Poland

Koelemeijer, S.
Programming of assembly-cells by shop floor operators: a solution for short reconfiguration
S. Koelemeijer, C. Wulliens, J. Jacot
Ecole Polytechnique Fédérale de Lausanne, Switzerland

Kovac, I.
New robot guided fixture concept for reconfigurable assembly systems
M. Gödl, I. Kovac, A. Frank, H. Rechberger, K. Haring
Graz University of Technology, Austria
Robot guided reconfiguration in the car body assembly
H. Trantin, I. Kovac, A. Frank, M. Szaniawski
Graz University of Technology, Austria
Virtual Simulation and Off-line Programming of Robot Guided Reconfiguration Systems
W. Fritz, I. Kovac, A. Frank
Graz University of Technology, Austria

Kraemer, O.
Flexibility Contracting in Make-To-Order Environments
N. Iliev, M. Jeck, O. Kraemer
Swiss Federal Institute of Technology, Switzerland

Krickler, R.
Rule Based Approach for Capturing an Reapplication of Manufacturing Knowledge in Production Development
R. Krikler, B. Culha
Universität Karlsruhe (TH), Germany

Kubota, F.
Holistic Methodology for Business Process Reengineering
M. Nakano, F. Kubota, S. Sato, C. Roser, M. Araki
Toyota Inc., Japan

Le Blond, J.
Integrated Factory and Logistics Planning
R. Kapp, J. le Blond, B. Lößfler, E. Westkämper
University of Stuttgart, Germany

Levashova, T.
Ontology-Driven Knowledge Sharing in Global Supply Chains
A. Smirnov, M. Pashkin, T. Levashova, N. Chilov
Russina Academy of Sciences, Russia

Lim, M. K.
Dynamically Integrated Manufacturing Systems - Concepts and Supporting Methodology
D. Z. Zhang, A. I. Anosike, M. K. Lim
University of Exeter, UK

Linner, S.
Digital Manufacturing goes Ramp Up
S. Linner, A. Simon
USG GmbH, Germany

Liverani, A.
Visual Overlay of Real and Virtual Objects in a CAD system
A. Liverani, L. Carbone, G. Amati
University of Bologna, Italy

Lößfler, B.
Integrated Factory and Logistics Planning
R. Kapp, J. le Blond, B. Lößfler, E. Westkämper
University of Stuttgart, Germany

Lomas, C.
Partner Profiling to support Agile Design
N. Armoutis, P. Matthews, C. Lomas, P. Maropoulos
University of Durham, UK

Luan, X.
A Methodology of Implementing Agile Manufacturing
Y. Sun, Z. Zhang, X. Luan, A. Roberts
University of Exeter, UK

Maropoulos, P.
Partner Profiling to support Agile Design
N. Armoutis, P. Matthews, C. Lomas, P. Maropoulos
University of Durham, UK

Matt D.
Design of self-contained, adaptable factory modules
D. Matt
Politecnico di Torino, Italy

Matthews, P.
Partner Profiling to support Agile Design
N. Armoutis, P. Matthews, C. Lomas, P. Maropoulos
University of Durham, UK
McIntosh, R.
Design for Changeover (DFC): enabling the design of highly flexible, highly responsive manufacturing processes
M. Reik, S. Culley, A. Mileham, G. Owen, R. McIntosh
University of Bath, UK

Mileham, A.
Design for Changeover (DFC): enabling the design of highly flexible, highly responsive manufacturing processes
M. Reik, S. Culley, A. Mileham, G. Owen, R. McIntosh
University of Bath, UK

Milionis, I.
DESYMA - An integrated method to Aid the design and the evaluation of RMS
K. Alexopoulos, S. Bürkner, I. Milionis, G. Chryssolouris
DaimlerChrysler AG, Germany

Montonen, J.
Integrating Cost of Ownership Analysis into Component-Based Simulation
J. Heilala, K. Helin, J. Montonen, P. Voho, M. Anttila
VTT Industrial Systems, Finland

Müller, E.
Cooperative Planning in Competence-cell-based Networks
E. Müller
Chemnitz University of Technology, Germany

Müller, N.
Continuous Factory Planning by using implemented Changeability
N. Müller, C. Rimpau, M. F. Zaeh
Technische Universität München, Germany

Methodology for Improving the Changeability of Order Processing
H. Wildemann, M. F. Zaeh, N. Müller
Technische Universität München, Germany

Mussini, B.
Information Exchange Processes and Supply Chain Relationships: an investigation in the Emilian Motor District
P. Barbieri, B. Mussini, A. Zanoni
University of Bologna, Italy

Nakano, M.
Holistic Methodology for Business Process Reengineering
M. Nakano, F. Kubota, S. Sato, C. Roser, M. Araki
Toyota Inc., Japan

Neise, P.
An Incentive Structure for the Management of Supplier Quality
Ö. Özer, P. Neise, M. F. Zaeh
Stanford University, USA; Technische Universität München, Germany

Özer, Ö.
An Incentive Structure for the Management of Supplier Quality
Ö. Özer, P. Neise, M. F. Zaeh
Stanford University, USA; Technische Universität München, Germany

Olivier, O.
Migration of monolithic ERP-Systems to flexible and component-based ERP-Systems
E. Schuster, O. Olivier, M. Hofmann
Mieschke Hofmann und Partner Porsche Services Company, Germany

Parsons, G.
Implementation of a Multi-Agent Approach to the Modelling of Human Dependent Production Systems
G. Parsons, D. Z. Zhang  
University of Exeter, UK

Pashkin, M.  
Ontology-Driven Knowledge Sharing in Global Supply Chains  
A. Smirnov, M. Pashkin, T. Levashova, N. Chilov  
Russia Academy of Sciences, Russia

Peter, K.  
A Concept for Configuration and Optimization of Global Value Added Networks  
J. Fleischer, M. Herrn, K. Peter, K. H. Sternemann  
Universität Karlsruhe (TH), Germany

Pochampally, K. K.  
Long-Range (Strategic) Planning Issues in Reverse Logistics  
S. M. Gupta, K. K. Pochampally  
Massachusetts Institute of Technology, USA

Rechberger, H.  
New robot guided fixture concept for reconfigurable assembly systems  
M. Gödl, I. Kovac, A. Frank, H. Rechberger, K. Haring  
Graz University of Technology, Austria

Rehling, S.  
Concept for a comprehensive operator training based on an interactive machine tool simulation model  
B. Denkena, K. Tracht, S. Rehling  
University of Hannover, Germany

Reik, M.  
Design for Changeover (DFC): enabling the design of highly flexible, highly responsive manufacturing processes  
M. Reik, S. Culley, A. Mileham, G. Owen, R. McIntosh  
University of Bath, UK

Rigamonti, M.  
Production requirements definition in a dynamic environment  
M. Rigamonti, T. Tolio, M. Tomasella, A. Valente  
Politecnico di Milano, Italy

Rimpau, C.  
Continuous Factory Planning by using implemented Changeability  
N. Müller, C. Rimpau, M. F. Zaeh  
Technische Universität München, Germany

Roberts, A.  
A Methodology of Implementing Agile Manufacturing  
Y. Sun, Z. Zhang, X. Luan, A. Roberts  
University of Exeter, UK

Roscher, J.  
Methods for flexibility evaluation in the automotive industry  
S. Bürkner, M. Friese, M. Schmitt, J. Roscher  
DaimlerChrysler AG, Germany

Roser, C.  
Holistic Methodology for Business Process Reengineering  
M. Nakano, F. Kubota, S. Sato, C. Roser, M. Araki  
Toyota Inc., Japan

Sachtleben, S.  
On Issues concerning the Phases of Evaluation and Break-up of Virtual Enterprises  
H. Jähn, S. Sachtleben, L. Zschoch
Chemnitz University of Technology, Germany

Sato, S.
Holistic Methodology for Business Process Reengineering
M. Nakano, F. Kubota, S. Sato, C. Roser, M. Araki
Toyota Inc., Japan

Sauer, A.
Complexity based approach for collaborative enterprise networks
R. Dekkers, A. Sauer, M. Schönung, G. Schuh
RWTH Aachen, Germany

Schäfer, A.
Telepresent Production: Overcoming the Network Problem with Recurrent Neural Networks
R. Grothmann, A. Schaefer, S. Clarke, M. F. Zach
Siemens AG, Germany; Technische Universität München, Germany

Schäfer, W.
Ramp-Up and Maintenance with AR in Development of Flexible Prod. Control Systems
J. Gausemeier, W. Schäfer, R. Eckes, R. Wagner
University of Paderborn, Germany

Schenk, M.
Combining Virtual Reality and Assembly Simulation for Production Planning and Worker Qualification
M. Schenk, S. Straßburger, H. Kissner
Fraunhofer IFF, Germany

Schleyer, C.
Planning methodology for lifecycle-oriented flexible production systems
G. Schuh, C. Schleyer, F. Zohm
RWTH Aachen, Germany

Schloegel, W.
Bringing the Digital Factory into Reality - Virtual Manufacturing with Real Automation Data
W. Schloegel
Siemens AG, Germany

Schmidgall, G.
Objectives of a seamless digital process chain in the automotive industry
T. Bär, J. Kiefer, G. Schmidgall, H. Burr
DaimlerChrysler AG, Germany

Schmitt, M.
Methods for flexibility evaluation in the automotive industry
S. Bürkner, M. Friese, M. Schmitt, J. Roscher
DaimlerChrysler AG, Germany

Schneider, M.
New methods for fuzzy acquisition of variant independent costs
J. Wulfberg, M. Schneider, H. Wilfried
University of the Federal Armed Forces, Germany

Schönung, M.
Complexity based approach for collaborative enterprise networks
R. Dekkers, A. Sauer, M. Schönung, G. Schuh
RWTH Aachen, Germany

Schuh, G.
Complexity based approach for collaborative enterprise networks
R. Dekkers, A. Sauer, M. Schönung, G. Schuh
RWTH Aachen, Germany
Increasing utilisation of automotive body shops by flexibility optimization
G. Schuh, N. Wemhöner, Ch. Friedrich
RWTH Aachen, Germany
Planning methodology for lifecycle-oriented flexible production systems
G. Schuh, C. Schleyer, F. Zohm
RWTH Aachen, Germany

Schuster, E.
Migration of monolithic ERP-Systems to flexible and component-based ERP-Systems
E. Schuster, O. Olivier, M. Hofmann
Mieschke Hofmann und Partner Porsche Services Company, Germany

Shabaka, A. I.
Mapping Products Machining Requirements and Machine Tools Structure Characteristics in RMS
A. I. Shabaka, H. A. ElMaraghy
University of Windsor, Canada

Sihn, W.
Intelligent Logistics for Innovative Product Technologies within the EU 5-Day Car Initiative
W. Sihn, J. Bischoff, M. Esterházy
Vienna University of Technology, Austria

Simon, A.
Digital Manufacturing goes Ramp Up
S. Linner, A. Simon
USG GmbH, Germany

Smirnov, A.
Ontology-Driven Knowledge Sharing in Global Supply Chains
A. Smirnov, M. Pashkin, T. Levashova, N. Chilov
Russian Academy of Sciences, Russia

Smith, D.
Exploring emergence and escalation in the creation of vulnerability within organisations
D. Smith
University of Liverpool Management School, UK

Sobczyk, T.
Cost Management Framework for a Value Stream
T. Sobczyk, T. Koch
Wroclaw University of Technology, Poland

Stepping, A.
Simulation Based Optimization of Work Piece Handling in Agile Manufacturing Systems
J. Fleischer, A. Stepping, J. Wieser
Universität Karlsruhe (TH), Germany

Sternemann, H.
A Concept for Configuration and Optimization of Global Value Added Networks
J. Fleischer, M. Herrn, K. Peter, K. H. Sternemann
Universität Karlsruhe (TH), Germany

Stetter, R.
Experiences with virtual production in small and middle-sized companies
R. Stetter
ITQ GmbH, Germany

Straßburger, S.
Combining Virtual Reality and Assembly Simulation for Production Planning and Worker Qualification
M. Schenk, S. Straßburger, H. Kissner
Fraunhofer IFF, Germany

Suh, N. P.
New challenges for manufacturing industry: Design of innovative products and productions systems
N. P. Suh
Massachusetts Institute of Technology, USA

Sun, Y.
A Methodology of Implementing Agile Manufacturing
Y. Sun, Z. Zhang, X. Luan, A. Roberts
University of Exeter, UK

Szaniawski, M.
Robot guided reconfiguration in the car body assembly
H. Trantin, I. Kovac, A. Frank, M. Szaniawski
Graz University of Technology, Austria

Takeuchi, Y.
On-site Visualization of Workpiece State for enhancing the recognition ability of machining operators
K. Teramoto, R. Tanaka, T. Ishida, Y. Takeuchi
Osaka University, Japan

Tanaka, R.
On-site Visualization of Workpiece State for enhancing the recognition ability of machining operators
K. Teramoto, R. Tanaka, T. Ishida, Y. Takeuchi
Osaka University, Japan

Teramato, K.
On-site Visualization of Workpiece State for enhancing the recognition ability of machining operators
K. Teramoto, R. Tanaka, T. Ishida, Y. Takeuchi
Osaka University, Japan

Tolio, T.
Production requirements definition in a dynamic environment
M. Rigamonti, T. Tolio, M. Tomasella, A. Valente
Politecnico di Milano, Italy

Tomasella, M.
Production requirements definition in a dynamic environment
M. Rigamonti, T. Tolio, M. Tomasella, A. Valente
Politecnico di Milano, Italy

Tracht, K.
Concept for a comprehensive operator training based on an interactive machine tool simulation model
B. Denkena, K. Tracht, S. Rehling
University of Hannover, Germany

Trad, A.
Improving Automated Manufacturing in distributed Environments using Specialized Design Patterns (SDP)
AMDEM - A “Proposed” Methodology
A. Trad
TradSoft GmbH, Switzerland

Trantin, H.
Robot guided reconfiguration in the car body assembly
H. Trantin, I. Kovac, A. Frank, M. Szaniawski
Graz University of Technology, Austria

Urbani, A.
Changeability as a key for lifecycle oriented investment evaluation
A. Urbani, A. Avai
National Research Council, Italy

Uusipaavaniemi, S.
E-supply application - A Finnish case study
P. Iskanius, H. Kilpala, S. Uusipaavalniemi
University of Oulu, Finland

Valente, A.
Production requirements definition in a dynamic environment
M. Rigamonti, T. Tolio, M. Tomasella, A. Valente
Politecnico di Milano, Italy

Vohio, P.
Integrating Cost of Ownership Analysis into Component-Based Simulation
J. Heilala, K. Helin, J. Montonen, P. Vohio, M. Anttila
VTT Industrial Systems, Finland

Wagner, R.
Ramp-Up and Maintenance with AR in Development of Flexible Prod. Control Systems
J. Gausemeier, W. Schäfer, R. Eckes, R. Wagner
University of Paderborn, Germany

Wemhöner, N.
Increasing utilisation of automotive body shops by flexibility optimization
G. Schuh, N. Wemhöner, Ch. Friedrich
RWTH Aachen, Germany

Westkämper, E.
Integrated Factory and Logistics Planning
R. Kapp, J. le Blond, B. Löfler, E. Westkämper
University of Stuttgart, Germany

Wieser, J.
Simulation Based Optimization of Work Piece Handling in Agile Manufacturing Systems
J. Fleischer, A. Stepping, J. Wieser
Universität Karlsruhe (TH), Germany

Wiesinger, G. F.
Workbench: A Tool for Reconfigurable and Agile Factory and Supply Chain Design
G. F. Wiesinger
University of Dortmund, Germany

Wildemann, H.
Methodology for Improving the Changeability of Order Processing
H. Wildemann, M. F. Zaeh, N. Müller
Technische Universität München, Germany

Wilfried, H.
New methods for fuzzy acquisition of variant independent costs
J. Wulfsberg, M. Schneider, H. Wilfried
University of the Federal Armed Forces, Germany

Wulfsberg, J.
New methods for fuzzy acquisition of variant independent costs
J. Wulfsberg, M. Schneider, H. Wilfried
University of the Federal Armed Forces, Germany

Wulliens, C.
Programming of assembly-cells by shop floor operators: a solution for short reconfiguration
S. Koelemeijer, C. Wulliens, J. Jacot
Ecole Polytechnique Fédérale de Lausanne, Switzerland

Wünsch, G.
A New Method for Fast Plant Startup
G. Wünsch, M. F. Zaeh
Technische Universität München, Germany
Zaeh, M. F.
A Holistic Framework for Enhancing the Changeability of Production Systems
M. F. Zaeh, N. Müller, C. Rimpau
Technische Universität München, Germany

Ö. Özer, P. Neise, M. F. Zaeh
Stanford University, USA; Technische Universität München, Germany
An Incentive Structure for the Management of Supplier Quality

R. Grothmann, A. Schaefer; S. Clarke, M. F. Zaeh
Siemens AG, Germany; Technische Universität München, Germany
Telepresent Production: Overcoming the Network Problem with Recurrent Neural Networks

G. Wünsch, M. F. Zaeh
Technische Universität München, Germany
A New Method for Fast Plant Startup

H. Wildemann, M. F. Zaeh, N. Müller
Technische Universität München, Germany
Methodology for Improving the Changeability of Order Processing

M. F. Zaeh, N. Möller, W. Vogl
Technische Universität München, Germany
Symbiosis of Changeable and Virtual Production – The Emperor’s New Clothes or Key Factor for Future Success?

Zanoni, A.
Information Exchange Processes and Supply Chain Relationships: an investigation in the Emilian Motor District
P. Barbieri, B. Mussini, A. Zanoni
University of Bologna, Italy

Zhang, D. Z.
Implementation of a Multi-Agent Approach to the Modelling of Human Dependent Production Systems
G. Parsons, D. Z. Zhang
University of Exeter, UK

Y. Sun, D. Z. Zhang, X. Luan, A. Roberts
University of Exeter, UK
Supply Chain Optimisation: A Multi-Agent Systems Approach

O. M. Akanle, D. Z. Zhang
University of Exeter, UK
Dynamically Integrated Manufacturing Systems- Concepts and Supporting Methodology

Zipse, O.
Changeability - More than Flexibility - A perspective of the BMW Group production network
O. Zipse
BMW Group AG, Germany

Zohm, F.
Planning methodology for lifecycle- oriented flexible production systems
G. Schuh, C. Schleyer, F. Zohm
RWTH Aachen, Germany

Zschorn, L.
On Issues concerning the Phases of Evaluation and Break-up of Virtual Enterprises
H. Jähn, S. Sachtleben, L. Zschorn
Chemnitz University of Technology, Germany
